	Page 86		Page 87
1	The parties may be seated.	1	THE JUROR: Back in the '80s.
2	All right. So you are Wiley Fairchild.	2	THE COURT: So it was a long time ago.
3	Correct?	3	THE JUROR: '90s. Yeah.
4	THE JUROR: Wiley Fairchild, yes.	4	THE COURT: Okay. Okay. So I'm going to
5	THE COURT: And you indicated to my	5	have some follow-up questions for you.
6	bailiff that you know Mr. Sneesby. Is that correct?	6	THE JUROR: Uh-huh.
7	THE JUROR: I don't technically know him.	7	THE COURT: The fact that you went to
8	I went to high school with him. He was a an	8	high school with Mr. Sneesby, would that prevent you
9	upperclassman when I was in high school.	9	from being fair and impartial in this case?
10	THE COURT: Okay.	10	THE JUROR: No, not at all.
11	THE JUROR: In the '80s; so it was a	11	THE COURT: Not at all? Okay.
12	long that was, like, the last time I had seen him.	12	Can you set aside the fact that you went
13	THE COURT: All right. And did you guys	13	to high school with him and decide this case based on
14	hang out together in high school?	14	the evidence presented in this case alone?
15	THE JUROR: No. We had the same	15	THE JUROR: Yes.
16	THE COURT: So you weren't part of the	16	THE COURT: And the fact that you went to
17	THE JUROR: We had the same activity, I	17	high school with Mr. Sneesby, could you decide this
18	guess you could say, skateboarding.	18	case based on the law, as I instruct you?
19	THE COURT: And did you hang out	19	THE JUROR: Uh-huh.
20	together?	20	THE COURT: That's a "yes"?
21	THE JUROR: No. I just recognized the	21 22	THE JUROR: Yes.
22 23	name and knew he was, like, one of the guys I'd	23	THE COURT: Okay. And my final question
23 24	skateboard with.	24	to you, would you give Mr. Sneesby's testimony
24 25	THE COURT: And when was the last time	25	greater weight than any other witness in this case,
23	you saw him?	25	given the fact that you went to high school together
	Page 88		Page 89
1		1	
1 2	Page 88 or went to the same high school? THE JUROR: No.	1 2	mean, we appreciate him letting us know, but
	or went to the same high school?		
2	or went to the same high school? THE JUROR: No.	2	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a
2	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you	2 3	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror.
2 3 4	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal?	2 3 4	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo?
2 3 4 5	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal.	2 3 4 5	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor.
2 3 4 5 6	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything.	2 3 4 5 6	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury.
2 3 4 5 6 7 8 9	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give	2 3 4 5 6 7	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record,
2 3 4 5 6 7 8 9	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other	2 3 4 5 6 7 8 9	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to
2 3 4 5 6 7 8 9 10	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case?	2 3 4 5 6 7 8 9 10	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild.
2 3 4 5 6 7 8 9 10 11	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah.	2 3 4 5 6 7 8 9 10 11	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.)
2 3 4 5 6 7 8 9 10 11 12	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you,	2 3 4 5 6 7 8 9 10 11 12 13	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with
2 3 4 5 6 7 8 9 10 11 12 13	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir.	2 3 4 5 6 7 8 9 10 11 12 13	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks. (Juror exits.)	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed. MR. TEBO: Thank you, Your Honor.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks. (Juror exits.) THE COURT: All right. You may be	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed. MR. TEBO: Thank you, Your Honor. Good morning, ladies and gentlemen.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks. (Juror exits.) THE COURT: All right. You may be seated.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed. MR. TEBO: Thank you, Your Honor. Good morning, ladies and gentlemen. THE JURY: Good morning.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks. (Juror exits.) THE COURT: All right. You may be seated. And so we're outside of the presence of	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed. MR. TEBO: Thank you, Your Honor. Good morning, ladies and gentlemen. THE JURY: Good morning. MR. TEBO: Thank you for being here.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks. (Juror exits.) THE COURT: All right. You may be seated. And so we're outside of the presence of the jury. Mr. Fairchild is back in the jury	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed. MR. TEBO: Thank you, Your Honor. Good morning, ladies and gentlemen. THE JURY: Good morning. MR. TEBO: Thank you for being here. My name is Christopher Tebo. I go by
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? I am one of the lawyers representing the corporate defendants in this case. And you've already heard a very good
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	or went to the same high school? THE JUROR: No. THE COURT: Would you give would you give less? THE JUROR: I would be equal. THE COURT: Equal? THE JUROR: Yeah, it wouldn't really matter that I knew him or anything. THE COURT: Okay. So you would give Mr. Sneesby's testimony the same weight as any other witness in this case? THE JUROR: Yeah. THE COURT: Okay. All right. Thank you, sir. THE WITNESS: Yes, thanks. (Juror exits.) THE COURT: All right. You may be seated. And so we're outside of the presence of the jury. Mr. Fairchild is back in the jury deliberation room. All right.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	mean, we appreciate him letting us know, but certainly nothing that would disqualify him as a juror. THE COURT: And Mr. Tebo? MR. TEBO: We concur, Your Honor. Nothing he indicated that gives us pause. THE COURT: Okay. Let's go ahead and bring in the jury. And let me just note for the record, outside the presence of the jury, I'm not going to excuse Mr. Fairchild. (Jury enters.) THE COURT: We're going to continue with opening statements. Mr. Tebo, you may proceed. MR. TEBO: Thank you, Your Honor. Good morning, ladies and gentlemen. THE JURY: Good morning. MR. TEBO: Thank you for being here. My name is Christopher Tebo. I go by Chris. I am one of the lawyers representing the corporate defendants in this case.

consideration.

I want to describe for you -- really, three things I would like you to keep in mind while you are weighing the evidence that's provided by both of the parties. I would like you to think of three themes during the presentation of the evidence and how these three themes apply as the evidence is provided to you. And these are the themes of experience, responsibility, and safety, because these are three key elements to the evidence that will be presented to you by both parties.

As it relates to experience, you're going to hear testimony about Mr. Razo and his background in this industry. You're going to learn that Mr. Razo was a group of a small cadre of individuals who had the specialized skills to operate this Raptor Hydrascope on a film set. You've already heard why that's part of the case, and that's because the film production company decided to rent this piece of equipment but had to have a specialized operator accompany the equipment to operate it while on the production that day.

And in this case, it wasn't just one operator, was it? Joe Datri, you're going to hear testimony from him. Mr. Datri was a second qualified

operator. So working that piece of equipment that morning were two highly seasoned professionals, people with specialized experience.

So, yes, they only come on the set for a few days at a time. They're not part of the month-long, sometimes four-, six-month-long crew and cast that are making this film from start to finish. They're brought in for a very specialized purpose, and that's to operate this very unique piece of equipment.

Now, Mr. Razo was on site, along with Mr. Datri, on the morning of June 20th, 2016. That was a Monday morning. It was the first day of filming at Pajarito Mountain, but it was not the first day of the entire production. It was day 6 of the entire production.

And, yes, there had been activities prior to Mr. Razo coming on scene that related to scouting the location, figuring out where people were going to be staged with their equipment down below at the parking area, figuring out where shots were going to be taken -- because, again, this is a movie about firefighters working in remote parts of the country. And it is based on a true story. It's based on a tragic story. But by its nature, the subject of the

Page 92

film requires an enormous amount of planning because one of the elements in this film is wildfire. And in order to depict wildfire on the screen, special effects have to be brought in; people who are experts in handling fire in a controlled fashion. And that's safety, right? That is the safety aspect of a film like this that's dealing already with a highly dangerous subject.

You will also hear evidence that Mr. Razo arrived on set for his call at 5:30 in the morning; he arrived there just prior to that time with Mr. Datri; and he didn't appear to know exactly what the timing of the use of the Raptor was going to be.

Now, one of the pieces of evidence will suggest that the director of photography made a snap decision that morning. "I'm going to change a shot. I'm going to change a piece of equipment that's required for the shot. I need the Raptor." That may have occurred.

But back to this theme of experience, why would that change have affected Mr. Razo in the slightest? It happens all the time. Decisions get made that you're not necessarily -- as an individual, a specialized operator of a piece of equipment, you're not necessarily involved in that decision.

Page 93

You're told, "We need this piece of equipment. We need it up now because we're going to set up for that first shot."

But this is a typical Monday morning. It's a typical Tuesday morning. It's a typical morning on any film set. Any film production. It's not a scurry around at the last minute. It's a recognition that we're going to do something and we need to put all of our equipment in place to do it. And that's what the evidence is going to show you.

You're going to hear testimony from the executive producer of this movie, Ellen Schwartz, who was on location that day. And what she's going to reiterate is that this was a production dealing with a subject that already has everyone's antenna up for ensuring a safe set. So every morning, the first assistant director, Bruce Franklin, holds a safety briefing. And it's not a safety briefing to give specific direction to the operator of the Raptor crane unit about which route to take or not take to put the equipment on top of the mountain. It's a safety briefing about the whole range of dangers of working out there on Pajarito Mountain.

So, for example, snakes, other kinds of wildlife. Exposure, varying temperatures. Gets

pretty hot up there above treeline or outside of the shade of trees on Pajarito Mountain in June. Wear enough sunscreen. You know, that sounds so basic. And I'm not trying to imply that somehow not putting on sunscreen is the equivalent of what happened to Mr. Razo, but that's something that people have to be aware of when they're working in that environment. Hydration.

The idea that safety wasn't a consideration is really not valid. And the evidence that you'll hear will reiterate that.

You will hear from Mr. Datri that when he and Mr. Razo loaded up that piece of equipment that -- that morning, they weren't a hundred percent sure how far they were going to drive it. They really didn't know how far they were going to drive it, frankly. And, in fact, they loaded it to have it ready for use but not with the idea that they might have to be driving for nearly an hour to get to the top of the mountain along a forest road. They loaded it up as if they were just going to drive it five or ten minutes down the road to set up on level ground.

Remember, Mr. Datri and Mr. Razo are the experts in handling this machine. They made that decision based on a lack of information. Now, why

didn't they get the information? That's evidence that you need to hear. You need to hear testimony about why neither Mr. Razo, nor Mr. Datri knew what was going on that morning until they were told by the best boy, Dave Santos, "We need that piece of equipment up the hill."

In other words, Mr. Razo and Mr. Datri dropped the equipment off late on Sunday -- so much so that it was starting to get dark. They had been in Albuquerque -- Mr. Razo had been in Albuquerque all that day. Mr. Datri flew in to meet Mr. Razo mid afternoon. But, based on the travel time, they didn't leave Albuquerque until very late afternoon, 4:30, 5 o'clock. So by the time they got up to Pajarito and they went through the security gates at the labs and they continued on up the road to the parking area at the ski basin, it was starting to get dark. 8:30 at night. So absolutely there wasn't an opportunity to necessarily get out and scout the route that evening. But they couldn't fail to know that they were parking it at the parking lot for the ski area and that filming was going to be taking place somewhere up on that mountain.

But the next morning, you won't hear anyone testify that either Mr. Datri or Mr. Razo

Page 96

specifically asked anyone for the details of how soon that morning they would start working. There was an assumption that was made that we were going to have a day for prep or a half day for prep, that we were not going to be traveling as far as they ended up having to travel to get toward the top of the mountain. These are assumptions.

The second theme, though, in this case is about responsibility. So Mr. Razo and Mr. Datri together made some assumptions that proved to be incorrect; when the Raptor was going to be needed, where it was going to be needed, how it was going to be needed to be prepped. And so, that morning, Mr. Santos started leading them up to the top of the mountain. He was riding one of those little ATVs, those little four-wheel ATVs.

And, as you have heard, the evidence will show Mr. Razo was driving the Raptor, and he was driving it very slow, very careful, very conscientiously all the way up this route that did not take him straight up the mountain; it worked its way along the side of the ridge and gained elevation. 96 percent, 97 percent of the entire route up to the top of the hill without incident.

Sometimes Mr. Datri would have to walk,

Page 97

maneuvering this huge crane arm in a way so that it wasn't damaged by trees, it didn't swing too heavily one direction or the other. They proceeded carefully and cautiously. And, you know, Mr. Datri's going to testify one of the interesting things about this job that he and Mr. Razo have is the challenges of getting this equipment where it needs to go. Mr. Datri has so much experience, like Mr. Razo, in operating this equipment in a remote location that, truthfully, one of the more interesting aspects of the job is knowing where they want to put it and trying to figure out how to get it there, how to get it there safely. Not just safely, though. How to get it without damaging the equipment.

This is a very complex -- you saw the photos -- this is a very complex piece of equipment. It has a very narrow purpose. It is not an inexpensive piece of equipment. Yes, the production is relying on the equipment to be there when it needs to be used. But as the operators of this equipment, Mr. Datri and Mr. Razo probably have foremost in their mind, after their own safety, a desire to make sure the equipment isn't damaged or harmed because, again, they have a very narrow role to play and they have the experience and the training to do that.

So when you look at the events of this day, ladies and gentlemen, I please want you to consider as you weigh this evidence -- all right? -who had the control? Was it the production company that was making noise through the key grip, Trevor Fulks, who I need to point out, you will not hear testimony from. There's a reason for that. Mr. Fulks is deceased. He can't tell you what he said. He's not here for that. You will hear what he said that others heard. But you can't actually hear what Mr. Fulks was thinking that evening.

25

So Mr. Fulks has kind of been held up as the instigator of all of this, that he was driving Mr. Razo forward in an unsafe way. How is that possible? That's the question to ask yourself as you do hear the evidence from both parties. How is it possible that someone on a radio -- I don't care what they're saying, Mr. Razo is the pilot of this ship. How does that person on the radio cause Mr. Razo to take an action that is actually completely different than any action he's taken up to this point, which is operate things safely?

Mr. Razo had the experience where he was desired by producers and production companies and cinematographers to be a part of this process. He

had no shortage of work, as you saw. He made a very good living because he was a specialist who did very good on his job. And he didn't pick Mr. Datri to accompany him either because Mr. Datri was a trainee or a shadow or just an observer. Mr. Datri was his copilot. He was backing him up.

So I do understand that the testimony you will hear will include a claim that Mr. Razo was not permitted to scout the route. But here's a thing you need to consider -- and this comes back to experience and responsibility -- 95, 96 percent of the route was not a problem. It was that last 50 or 60 yards up that obviously steep road. It was an attempt to drive up that road without first assessing what the other alternatives were that existed.

Mr. Santos was leading them up on his little ATV. Okay? Couldn't Mr. Datri have asked Mr. Santos to take a 30-second drive down that road to the right? They stopped when they got to that fork in the road because they could see ahead of them, that was one steep slope. They didn't do that. They couldn't take 30 seconds to have Mr. Datri drive down and see what was down that fork to the right?

You could tell, just by looking at it, to the right was not as steep of a slope as what was in

Page 100

front of them. What about Mr. Datri? Mr. Datri could have walked up that slope, gotten to the top, looked around. Maybe there were other roads coming into the top of the ski mountain. What you could see from that fork in the road, though -- and you'll see the photos, you'll hear the testimony -- is you could see the big metal wheel of the ski lift up there. So it was pretty obvious to anyone looking at that that

that slope would get you to the top of the mountain. And here's a real key issue that is the third theme in this case: Safety. The argument that's raised and the evidence that you will hear from some of the witnesses is that somehow the very existence of that steep road should have been noted, identified, and blocked off. That would have presented -- prevented -- excuse me -- prevented Mr. Razo from attempting to drive up it. That may be true. A barrier across that steep road probably would have made Mr. Razo and Mr. Datri think twice.

But it is an obvious nature of the road that it's steep. It is the operator of the Raptor that is facing that road. Who makes the call? Trevor Fulks, who is not even there, who's squawking on the radio? I don't know Mr. Fulks. I never met Mr. Fulks. I have no idea whether Mr. Fulks is one

of those people that you want to spend time around. But I'll go back to the point. What really could

Page 101

Trevor Fulks have said to make Mr. Razo ignore the slope, given how the Raptor was configured? And that matters.

You're going to hear testimony from an expert retained by the defense, a reconstructionist, who is going to come in and he's going to provide you testimony about how, in his view, the accident occurred. You know, we know that the accident occurred. We know that the machine rolled over and it injured Mr. Razo horribly. We know this. But what were the factors that led to that?

Mr. Beauchamp is going to look at really three factors. The environment. What was the road? What was its grade? What was its steepness? What was its condition? The equipment. How did the configuration of that Raptor that day, by the two operators who knew it best, how did that contribute to its propensity or lack of propensity to simply rolled over when it hit a slope, when the wheels lost traction? How did all of that come into play? And then the third aspect of Mr. Beauchamp's testimony is he's going to talk about the operator. And he is going to blame three factors: Environment,

26 (Pages 98 to 101)

Page 102 Page 103

equipment, operator as contributory.

Mr. Razo is not being blamed for his injuries. Mr. Razo's lapse of judgment is what is being pointed out. He made a call, and it was the wrong call. He drove up that slope after having first paused at the fork, and he did so without Mr. Datri offering him any advice or assistance at all. I mean, Mr. Datri bears some responsibility for this as well. And the evidence will show that. Because he wasn't a passive observer there that day. He wasn't, for example, Dave Santos, the best boy. Mr. Datri was only there to back up his pilot, Mr. Razo. Mr. Datri has significant experience, just like Mr. Razo. He didn't use that experience, and one could look at the evidence and conclude that Mr. Razo lost sight of his experience as well.

So one of the -- one of the themes, when we talk about safety, is what was the lapse in safety from the production from No Exit? What did they not take into account that led this specialized operator of equipment to make the wrong call in terms of the outcome? In other words, it may have seemed like driving up was something that could happen, but we know how it turned out. So how does a so-called lack of safety awareness, safety regulations, how does

that play into what actually happened?

What the defense will suggest is that the evidence will show you that safety awareness, safety policies, safety protocol, the overall safety of this location had nothing to do with Mr. Razo's choice. He wasn't forced. And here's why. This goes back to experience.

Mr. Razo has the ability, if he doesn't feel like he's getting what he needs, to escalate it, just like any other highly skilled professional. The suggestion is that he was somehow controlled by the production. But you can't have it both ways. And the evidence is going to show that Mr. Razo was there working for the production.

He was sent by Chapman/Leonard in conjunction with the rental of the equipment.

Mr. Razo had talked with Mr. Fulks a week and a half prior to arriving on location with the equipment.

Mr. Razo had to pack up all the equipment and drive from Southern California all the way to New Mexico, do some more prep work with the equipment in Albuquerque, get his copilot, codriver, co-operator, and go up to Pajarito. All of these things were part of Mr. Razo's job. And not once did he pick up a phone, send an e-mail, asking for something as

Page 104

Page 105

specific as what time will we need to be on top of the mountain?

Okay. He got there in time for crew call that morning. Not once did Mr. Razo or Mr. Datri ask Bruce Franklin, when Bruce was doing his safety briefing that morning, whether the Raptor was going to be needed at the top. Not once did Mr. Datri or Mr. Razo convey the concerns directly to the people who were running this production.

Mr. Santos will testify there were conversations that went on. He was, like, a go-between. Okay. But he's not a decisionmaker. And when you are in that role of basically being the pilot, you don't need to deal with folks who can't make decisions in order to do the job that you need to do. And that's what the evidence is going to show -- that this industry is not really that different in so many ways from other industries that rely on disparate groups of professionals, people that are experts in their field, people who may never have met each other before they come together to do a very complex activity.

So here's what also plays into that. This is the issue of safety. There's a misnomer that somehow the film industry is a rush, rush, rush, rush, rush to get it. But that's belied by the fact that this was not a minor production. "Only the Brave" was a 46-million-dollar A-list production. Josh Brolin was one of the stars. The director of this particular film had a wonderful reputation. You already heard about the reputation and the experience of the director of photography.

Now, as you listen to the evidence, try and imagine why anybody working on this production would want to run the risk of having the Raptor put in a position where it flipped over on its operator? And I know there's a very -- there's a very straightforward answer that you might hear that, well, this was all about money, and time is money. Time is money. It's Hollywood. Time is money. And that may be true in some areas. But it's safe to say that having the Raptor damaged and roll over on its operator is the antithesis of what any film production would want.

As you heard, the Raptor had to be replaced. It had to be brought up the next day. Not only that, it was Mr. Datri who took the Raptor up the next day. Guess what he did, though? He had the weights -- these 30-pound steel plates -- he had them transported by truck because -- and not

27 (Pages 102 to 105)

Page 106 Page 107

surprisingly -- he didn't want to have a similar situation as what happened with Mr. Razo.

I also want to point out that the evidence will show you that Mr. Razo and Mr. Datri had a lot of experience working in mountainous country, that the idea they would have to tool this Raptor up this forest road for a couple of miles wasn't something unusual for them to have to deal with. Quite frankly, there will be no evidence presented that will support the idea that if Mr. Razo had said, "We're going to have to take the weights off because we can't get this up," that anybody would have been able to prevent that from occurring.

What Mr. Fulks was squawking about is not, in hindsight, very attractive, but it doesn't change the fact that Mr. Razo was the one with the power and Mr. Datri was the one with the power. And Mr. Razo didn't exercise that right and that ability that he had.

You'll also review, as part of your exhibits, the production's policy. Now, this policy was e-mailed out a couple of days before. Mr. Datri got a copy. It doesn't look like Mr. Razo got a copy of this policy. Mr. Datri forwarded him the policy Sunday evening after they got back to their hotel in

Santa Fe.

The top paragraph of that policy, the top line, is that safety should never be compromised for expediency. And Mr. Razo is a case example of what can happen when someone doesn't think far enough ahead of the implications of what they're doing. But he was a sole operator along with his partner. That policy is so critical, though, because of all those things I described to you that are going on in this particular kind of film.

I mean, this is a bit of an outlier in terms of hazardous topics, hazardous subjects. But it's not that unusual in film productions to have lots of really, really complex things going on with the explosives, pyrotechnics, with all sorts of things that can harm a person. So expediency in the name of safety is not something that is condoned. The safe action is always the better action. And Mr. Razo and Mr. Datri, both of them knew this. They've been working too long in the industry not to know this.

Now, I know a lot of evidence in this case will be related to Mr. Razo's claimed damages in this suit. And I'm going to remind you of what I told you during jury selection. At no point will the

Page 108

108 | 1 Mr. Razo

Page 109

defense be attempting to introduce any evidence to suggest that Mr. Razo's injuries are any less than how they're being portrayed. I want to reiterate that point. The defense can view this case as Mr. Razo's responsibility without calling into question the fact that the decision he made resulted in such horrific injuries. It comes back to that idea of responsibility, though, because that's a critical component of how this occurred.

You know, the evidence won't show you that Mr. Razo was there for his first day. He made a choice based on his experience and training. Frankly, he thought he could get it up the hill. And he was wrong. And the defense doesn't blame Mr. Razo for being wrong. The defense takes issue that Mr. Razo's claims are all predicated on the idea that it was the defendant's actions that led him down that wrong path. So I know and I appreciate that Mr. Razo believes that he bears some of the responsibility for this. But what the defense will suggest to you is that 25 percent is not the number.

It just doesn't take into account Mr. Razo's power to make choices as a professional in this industry, one who is beholden -- as has been established, right? The evidence will show that

Mr. Razo was not beholden to anyone. He had the work. He was there for the purpose.

So when it comes to this allocation of responsibility, I want you to flip that equation over. And I know it's a hard thing to ask, and I'm not suggesting that the defendants want you to do that because they're trying to escape from something they did.

And as I also told you during jury selection, what the evidence will show is that the defendants could have done a lot of things in hindsight that would have kept Mr. Razo from driving up that little steep shortcut. And one of them could be to put a barrier up. But is that reasonable? It's a ski mountain. There are roads all over the place. From the top, you can look down and, you know, quite frankly, it's ski slopes. So they drop straight down. They'd be difficult to walk, let alone drive a vehicle like the Raptor up.

But that inverse consideration is important because not having a particular policy to guide a particular operator of a particular piece of specialized equipment is not really what's at issue here. What's at issue, and what the evidence will show you, is that Mr. Santos led them up almost to

Page 110

Now, Mr. Datri followed holding what's called the bucket. It's not really a bucket; it's really a counterweight. But it's called a bucket because it was once a bucket. Mr. Razo drove slowly and carefully, and right there, that tells you that he had a pretty good idea of what he was doing. And it didn't work out. He made the wrong call. I'm sure he would admit that. I'm sure anyone looking at this would admit that that was the wrong decision in hindsight. But it's not appropriate in hindsight to say, "Hey, you didn't have a cone in front of that road. You didn't have a sign in front of that road" because -- and the evidence you'll hear won't suggest that that's what should have happened.

I know there will be testimony from the plaintiff's safety expert, Mr. Avrit. I know that he will draw analogies between his field of expertise and view this worksite as unsafe. We understand that. But, you know, the flip side of that is that one of the defense experts -- a gentleman named Bill Witthans -- Mr. Witthans has basically has been Mr. Razo for his career.

Mr. Witthans has worked on numerous film

productions like Mr. Razo and Mr. Datri. And you know what Mr. Witthans is going to say, not surprisingly? They should have taken the time to think about it. And there is no way, according to Mr. Witthans, that anybody with the kind of experience that Mr. Razo had would ever have been rattled by somebody on the radio squawking at him, telling him, "We need to get you up there. I don't care how they get it up there. Just get them up. I don't care."

I think Mr. Fulks is, at one point, reported to have said, "I don't give a damn. Just get them up." Wow. What a loose cannon. But not in the driver's seat. Not the one with the ability to make a difference. All he can do is spout off. And that's pretty key in this case.

Mr. Razo has enormous injuries that are going to require future care, future treatment. The defense will provide a life care expert that has examined the materials that the plaintiffs' life care expert relied upon. Dr. Elizabeth Davis has looked at future care. And one of the things that she's identified and she will testify to is that while the plaintiff's life care expert draws a single point in terms of a specific number, Dr. Davis views it more

Page 112

realistically as a spectrum. That it's not enough to say, I'm going to point to one number because -right? -- we can't predict the future. We know that there are variables. We know that Mr. Razo will require future care. We know it could consist of certain kinds of care. But we just don't know the extent of that.

That's Dr. Davis's perspective. Not so much that the cost of a certain type of care has been calculated incorrectly, but more that the idea that a single number is exactly what you have to rely upon to define future care needs.

The other thing that you'll hear testimony on is related to Mr. Razo's claimed loss income, lost wages, recognizing that the plaintiffs still have a burden -- and that's that burden of persuasion that was described to you -- 50 percent plus .1 percent, more likely than not, on that scale.

The plaintiffs will bring in an economist to talk about Mr. Razo's lost future earnings, projected. The defense will bring in an economist to talk about very similar issues. But, again, the difference between the two areas of testimony is that the defense economist, Dr. Ganderton from UNM, will not assume that Mr. Razo is incapable of engaging in

any kind of activity that could lead to income.

Why might that be?

It goes back to that first theme: Experience. Mr. Razo is part of an elite few. He's still part of an elite few because the knowledge he has in his head is incredibly valuable. Consulting, teaching, participating in the industry in a different way than actually getting out and physically operating that Raptor, these are not off the table. You may hear testimony that Mr. Razo is not capable of working. That is quite a broad brush, through testimony, to present.

In reality, life doesn't work that way, even when you've experienced, the way Mr. Razo has, the kind of injuries that are going to be described to you. That's the big difference.

And recognizing that the plaintiff does have the burden in this case to persuade you, it's important that you hear evidence that offers you the defense's viewpoints, not because the defense is introducing testimony to ask you to award Mr. Razo all of the costs incurred for medical care, past and future, but because part of the defense's job is to make sure you understand the range of the evidence that exists in this case.

29 (Pages 110 to 113)

Page 114

Page 115

Page 117

Now, I told you, during jury selection, that there's a controversy that's present. Your presence here today is clear evidence of that. There are two ways to look at what happened to Mr. Razo, and the evidence that you'll receive from witnesses for both sides will help you weigh that. You'll be able to make your own decisions, based on your understanding of the evidence, as well as in the context of who you are as individuals.

You'll have to consider this very difficult issue of responsibility. You'll have to weigh Mr. Razo's background and experience in the context of what occurred. And you will have to look at the idea of safety. Who was being unsafe that day and how? And what did it lead to?

I guarantee you, it led to a result that no one involved in this case would have wanted to occur. Nobody. It's tragic, and it's unfortunate that it happened to Mr. Razo.

Mr. Datri is going to testify, along with Mr. Razo, that they both felt incredibly rushed that morning. They got the sense -- I think as Mr. Datri will describe, they got the sense people just didn't know what was going on because this message came down from on high that the Raptor must be taken up to the

top of the mountain. Totally understandable. Maybe a change was made. Maybe a decision was made. We have to get the Raptor to the top of the mountain.

But two people, like Mr. Datri and Mr. Razo, should never have felt so rushed that they stopped thinking. And in fact, that's as good of an example of how the testimony will describe their actions. They weren't thinking. Because if they were, they would have made those other choices that I talked to you about.

You'll also hear testimony from Mr. Santos, Mr. Sneesby, Mr. Willis. These are all people who worked on the production crew. Mr. Sneesby, Mr. Willis, they were up on top of the hill. None of them saw this incident occur. They heard radio chatter. I think Mr. Sneesby is going to testify and Mr. Willis will testify that Trevor Fulks was on the radio squawking. Mr. Santos was the one leading them up. He was called the best boy. And that -- there will be testimony to suggest that.

Mr. Santos had no idea where he was going. It's quite possible. He had never driven that route before. But he got them to the point in the fork in the road where they stopped. He didn't -- Mr. Santos did not tell Mr. Razo to drive

Page 116

up that slope. Mr. Santos passed along over the

But keep in mind, Trevor Fulks wasn't there. So how would Trevor Fulks even know where they were? That's something to consider. It's something to weigh.

radio what he was hearing from Trevor Fulks.

And it goes back to this idea: What difference does it make what Trevor Fulks said? He couldn't touch Mr. Razo because only Mr. Razo could operate the equipment.

Two excellent points, ladies and gentlemen, to also consider. Two excellent points. Never put people in danger to save time. I think that that is a strong message to keep in mind. That goes back to the theme of safety. I think it's fair to say that taking shortcuts, putting people in danger usually doesn't end up saving time. And that's a very good point. It certainly didn't result -- to be the case in this case.

And the other thing is, is if you fail to plan, you plan to fail. Again, that is a truism. But who failed to plan, as part of this tragic set of events? Who failed to plan that morning? Who failed to make a call on the drive out from California? If you need the info, ask for the info. If you see

something, say something. These are the kinds of things that we do when we're in charge of ourselves.

So we agree with that. Mr. Razo failed to plan that morning. He made some assumptions, and it didn't work out, what he assumed, the way he assumed. He assumed that the Raptor wouldn't be needed right away. He was only there with the Raptor for four days. That was the expected time that he was going to be onsite.

He didn't need to scout the whole route because he had Mr. Santos leading him slowly and carefully up that route. He did need to scout that little piece of 50 or 60 yards on that steep shortcut. He needed to scout a couple of minutes down that turn to the right. Nobody denied him that opportunity because he never asked for that. He didn't need to ask for that, quite frankly. If you're driving a piece of equipment through the woods and you come to a point where you're not sure if you can get it up the hill, what the evidence will suggest is that the best thing you can do is assess the situation and figure it out. Mr. Datri would agree with that. I'm sure of it. And I'm sure Mr. Razo would agree with it.

There are a lot of areas -- as you learn

about Pajarito Mountain, there are a lot of areas that no one in their right mind would drive a piece of equipment like the Raptor. There are a lot of areas on that mountain that you would not drive a four-wheel-drive vehicle. That's the nature of Pajarito as a ski mountain. It is mountainous country, and it's clearly obvious that you have to be careful and you have to make good decisions when you're operating equipment on it.

So that, ladies and gentlemen, is what this case really involves. It's -- it's not a case about someone who couldn't say no. It's a case about someone who didn't take the opportunities that were available to make good decisions.

I know that you'll be asked to award damages related to medical care, loss of enjoyment of life, pain and suffering. Loss of what we term as "consortia" for Ms. Weinmuller. All of these kinds of damages are all very important to Mr. Razo's future care, future well-being, but they are not the burden of the defense, in this case, and that is what the purpose of the defense's evidence will highlight for you.

I echo the plaintiffs' perspective that none of us would really want to be here this week, hearing this case. But it's such an important case for a lot of reasons. It's an important case to Mr. Razo and Ms. Weinmuller. It's an important case to my clients, Black Label and No Exit. It's an important case because the evidence in this case really requires to you decide one side of the responsibility view, one side of the experience view, one side of the safety view, and you are the ones who will make those decisions for us.

So I -- I look forward to hearing the plaintiffs' case presented in chief. I also look forward, when the time comes, to presenting the defense case, and I look forward to seeing you all throughout this week. And I greatly appreciate your time and attention. Thank you.

THE COURT: All right. Members of the jury, I have a couple of instructions for you. We're going to start witness testimony here in just a moment.

My first instruction for you is when an exhibit is presented to you in open court, you should not discuss it with other jurors. You should not point out to another juror matters that seem important to you. You should not whisper back and forth with other jurors about the exhibit. You

Page 120

should have an opportunity -- or you will have an opportunity to discuss the exhibits in the jury room.

Also, it is the job of a lawyer to object to questions, testimony, or exhibits a lawyer believes may not be proper. I will sustain objections if the question, where evidence sought, is improper for you to consider. When I sustain an objection, the question or evidence is not allowed. You must not consider such evidence, nor may you consider any evidence I have told you to disregard.

By itself, a question is not evidence. You must not speculate about what would be the answer to a question that I rule cannot be answered. If I overrule an objection, then the question or evidence will be allowed.

All right.

Mr. Hunt, if you would call your first witness.

MR. HUNT: Yes, Your Honor. We're going to call Paul Willis via deposition.

THE COURT: All right. Members of the jury, another instruction for you. So this witness, this first witness is going to testify by deposition. I need to explain to you what a deposition is.

A deposition is testimony taken under oath before trial and has been preserved in writing or by video. This testimony is entitled to the same consideration as any other testimony, during the trial.

Page 121

And, Mr. Hunt, I do intend to take a lunch break at noon; so if you can anticipate that. MR. HUNT: Sure, Judge. This witness is 20 minutes, so --

THE COURT: Well, then we'll --MR. HUNT: -- we'll be right there. THE COURT: All right. MR. HUNT: It might be 12:05. THE COURT: All right. Thank you.

15 MR. HUNT: I think I had switched it 16 over, if you can give me permission on here. 17

THE COURT: Yes. MR. HUNT: Okay. (Video deposition played.)

> **EXAMINATION** BY MS. RIVER (VIA VIDEO DEPOSITION):

23 Q. Mr. Willis, what is your full --24 MR. HUNT: All right. Let's see. 25

THE COURT: You'll need to turn that up a
